ACTIVE CONNECTIONS CLG'S APPROACH

Active Connections Field Guides are experienced facilitators. We use Brief Solution Focused Coaching as an integral tool as it helps the client map their own solution to problems, which they can transfer back to the workplace. To get there, we apply an experiential learning process where teams can actively test leadership, communication and cooperation.

This guided process will strengthen a team's cohesion, their

understanding of one another and can bring the organisations values to life for employees. The outcome is an expanded capacity to problem solve, work effectively as a team and be resilient.

Experiences in the outdoors have been proven to reduce stress, improve mood and increase energy levels.
